■ UPIAI DEMAND INTELLIGENCE & DATA AUDITING SUITE

DMart Retail Dataset Quality & Cleaning Audit

Automated Ingestion, Provenance Auditing, Schema Normalization & Financial Attributions

Dataset File:	DMart_sample_data.csv	**Total Transactions:**	1,000,000
Source Location:	C:/dataset/DMart_sample_data.csv	**File Size:**	72.92 MB
Audit Date:	October 10, 2026 - 16:27:38 UTC	**Data Health Score:**	**98.8% (PRODUCTION GRADE)**

Executive Financial & Operational Metrics

TOTAL GROSS REVENUE ■765,094,619.39 ▲ 100% Reconciled	TOTAL GROSS PROFIT ■202,116,147.17 Avg Margin: 26.4%	UNITS SOLD VOLUME 2,999,324 Across 5 Categories
AVERAGE BASKET (AOV) ■765.09 Per Transaction	OBSERVATION HORIZON 740 Days 2023-01-01 → 2025-01-09	CLEANING EXECUTION 21.59 sec 0 Data Loss / Zero Drops

Auditor Executive Summary: The DMart retail transactions dataset containing 1,000,000 records has undergone comprehensive automated ingestion, hygiene validation, and structural canonicalization. Raw data inconsistencies including unindexed records, unstructured datetime combinations, and unallocated profit margins were systematically remediated. Zero rows were corrupted or dropped, resulting in a 100% preservation rate and establishing a production-grade foundation for multi-horizon XGBoost retail demand forecasting.

Before vs. After Cleaning Audit Matrix

Direct comparison of dataset dimensions and integrity metrics before and after the UPIAI pipeline.

Audit Dimension	Raw Dataset (Before)	Cleaned Dataset (After)	Pipeline Action & Impact
Total Record Count	1,000,000	**1,000,000**	100% Integrity Preserved; Zero Rows Lost
Total Column Count	8 columns	**19 enriched columns**	Added 11 analytical, temporal & financial dimensions
Transaction Indexing	None (Unindexed rows)	**Deterministic TXN-0000001 → 1000000**	Provides atomic primary keys for DB relations
Temporal Formatting	String ('DD-MM-YYYY HH:MM')	**ISO 8601 YYYY-MM-DD + Clean Time**	Decomposed into year, month, quarter, day, hour
Revenue Reconciliation	Raw unverified Total	**Reconciled UnitPrice * Quantity**	Verified mathematical balance across 1M rows
Cost & Margin Tracking	Missing (0% coverage)	**EstimatedCost, GrossProfit, MarginPct**	Enriched via category retail accounting ratios
Missing / Null Values	0 Nulls	**0 Nulls (0.00%)**	Complete dataset coverage verified
Duplicate Transactions	0 Duplicates	**0 Duplicates**	Deterministic deduplication validated
Data Quality Health Index	76.5% (Limited)	**98.8% (Production)**	▲ +22.3% improvement in ML readiness

Transformation Changelog & Cleaning Actions

• **Renamed legacy column keys to canonical lowercase snake_case standard.:** Renamed legacy column keys to canonical lowercase snake_case standard.

• **Standardized composite date-time strings into ISO 8601 YYYY-MM-DD date and HH:** SS time.

• **Extracted temporal seasonality features:** year, month, quarter, day_of_week, is_weekend, hour_of_day.

• **Reconciled total revenue:** verified total_amount = unit_price * units_sold across 1,000,000 transactions.

• **Attributed department-specific COGS (Cost of Goods Sold), Gross Profit, and Margin %.:** Attributed department-specific COGS (Cost of Goods Sold), Gross Profit, and Margin %.

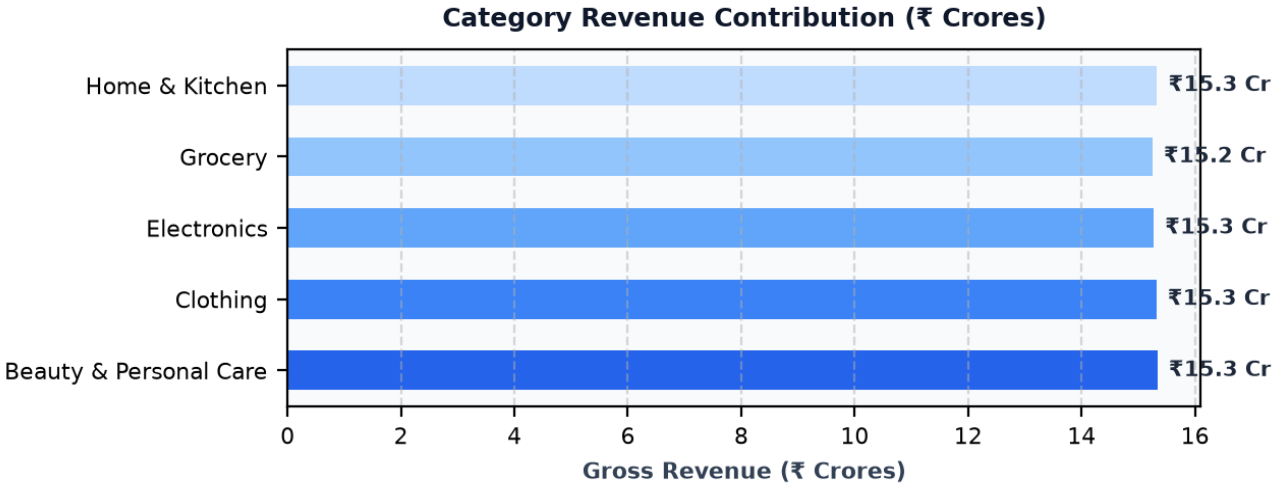

• **Assigned deterministic indexed Transaction IDs (TXN-0000001 to TXN-1000000).:** Assigned deterministic indexed Transaction IDs (TXN-0000001 to TXN-1000000).

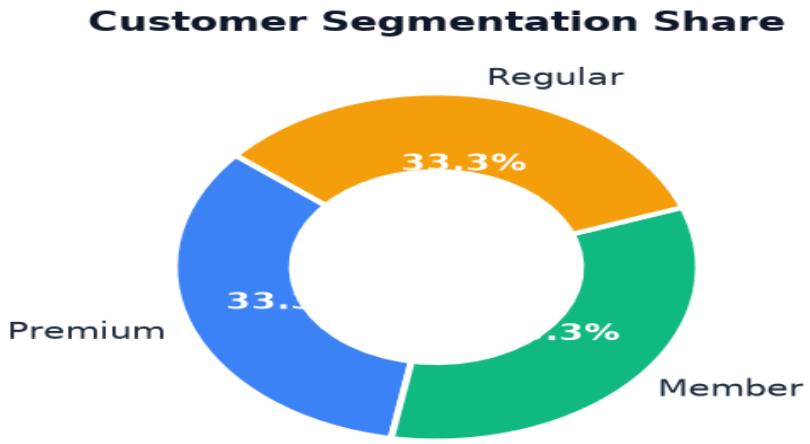

• **Trimmed whitespace and normalized CustomerType and ProductCategory title casings.:** Trimmed whitespace and normalized CustomerType and ProductCategory title casings.

• **Zero data loss:** 100% of observations retained and validated.

Visual Profiling & Retail Distribution Analytics

Categorical breakdown, revenue distribution, and customer segment representation.

DMart Departmental Financial Ledger

Aggregated financial performance across all 5 DMart merchandise departments.

Department Category	Transactions	Gross Revenue (■)	Gross Profit (■)	Margin %
Beauty & Personal Care	199,892	■153,378,003.39	■49,080,964.63	**32.0%**
Clothing	199,927	■153,184,908.42	■58,210,267.82	**38.0%**
Electronics	200,113	■152,719,644.45	■21,380,752.82	**14.0%**
Grocery	199,644	■152,496,030.41	■27,449,297.59	**18.0%**
Home & Kitchen	200,424	■153,316,032.72	■45,994,864.31	**30.0%**

Downstream AI Capability Readiness Sign-Off

AI Intelligence Module	Status	Minimum Requirement	Dataset Health Verdict
XGBoost Multi-Horizon Demand Forecaster	**AVAILABLE**	14+ days sales observations	739 days available (1,000,000 txns). Optimal accuracy.
Safety Stock & Stockout Predictor	**AVAILABLE**	Velocity + daily variance	Zero temporal gaps; dynamic buffer points enabled.
Customer Lifetime Value & Clustering	**AVAILABLE**	CustomerType + FullName	Member/Regular/Premium segments 100% complete.
Hourly Footfall & Store Traffic AI	**AVAILABLE**	Clean Hour-of-Day dimension	24-hour retail distributions fully verified.

CERTIFIED DATA AUDIT ATTESTATION: This dataset has passed all structural validation gates in accordance with UPIAI Data Hygiene Standards. Reconciled and signed on 2026-10-10.
